

Utah County Health Department is a contracted provider for vaccines with the following insurance companies. A current primary insurance card must be presented at each visit. Altius and adult Medicaid require collection of appropriate co-pays at the time of service.

- Altius
- DMBA
- PEHP
- Select Health
- United Health Care
- Medicare and many Medicare Advantage Plans
- Medicaid
- CHIP

Not all vaccines are covered by every insurance plan. It is important to know and understand your insurance plan and if it covers vaccines administered at Utah County Health Department. Deductible, coinsurance, preventive care and age restrictions may affect insurance coverage. Any unpaid balance of services rendered will be billed to the responsible party.

Payment will be required if an insurance plan is not listed above. A receipt will be provided to submit the claim for insurance reimbursement.

Children from birth through 18 years of age who meet the following criteria are eligible for the Vaccines for Children (VFC) program:

- Uninsured
- Medicaid coverage
- CHIP insurance
- Under insured (have health insurance that does not pay for vaccines)
- American Indian or Alaskan Native

Uninsured, under insured, American Indian and Alaskan Native children are charged only the administration fee of \$14.52 per injection which can be reduced to \$12 if paid at time of service.

Medicaid and Chip eligible children are not charged a fee.

We accept cash, Utah checks, credit cards (VISA or Master Charge).
